

Creating LTI Tool in Moodle

Please note: our instructions may differ slightly from the Moodle version and settings in use at your institution. Use these as a guide as they may not be an exact match to how Moodle functions for you.

Create the Tool

1. In the **Administration Panel**, go to **Site administration -> Plugins -> Activity modules -> LTI -> Manage external tool types** (NOT external tool registrations).
2. Select **Add External Tool Configuration**.

Manage external tool types

External tool types

3. Name the new LTI tool as you wish (ex. Infobase Learning Cloud LTI).
4. Use <https://platformapi.learningcloud.infobase.com/apps/lti/> for **Tool Base URL**.
5. Enter **Key** and **Secret** provided by Infobase Learning Cloud team.

External tool configuration

Tool settings

A screenshot of the Moodle "External tool configuration" form. The form has several fields: "Tool name" (Infobase Learning Cloud LTI), "Tool base URL" (https://platformapi.learningcloud.infobase.com/apps/lti/), "Consumer key" (with a red arrow pointing to the input field), "Shared secret" (with a red arrow pointing to the input field and an "Unmask" checkbox), "Custom parameters" (portal= with a red arrow pointing to the input field), "Show tool type when creating tool instances" (checkbox), and "Default launch container" (Embed, without blocks).

6. In **Custom Parameters**, enter **portal=YOUR Portal ID#** (# sent from Infobase Learning Cloud team).
7. For **Privacy** settings, select **Always** for all share/accept choices.

Privacy

A screenshot of the Moodle "Privacy" settings section. It shows three dropdown menus: "Share launcher's name with tool" (Always), "Share launcher's email with tool" (Always), and "Accept grades from the tool" (Always). There is also a checkbox for "Force SSL".

8. Save.

The new LTI Tool should now be ready to use. Please try pulling content into a test course and **enjoy!**
