

Creating LTI Tool in Schoology

Create the App

1. Under **Tools -> School Management -> System Settings**, select **Integration** (do NOT add from the App Center).

2. Select **External Tools** and then **Add External Tool Provider**.

3. Name new LTI tool as you wish.
4. Enter **Key** and **Secret** provided by Infobase Learning Cloud team.
5. Set **Privacy** to “Send Name and Email/Username of user who launches the tool,” set **Configuration** to “Manual,” and set **Match By** to “URL.”

6. Copy & paste <https://platformapi.learningcloud.infobase.com/apps/lti/> into Domain/URL box.
7. In **Custom Parameters**, enter **portal=YOUR Portal ID#** (# sent from Infobase Learning Cloud team).
8. Submit.

The new LTI Tool should now be ready to use. Please try pulling content into a test course and **enjoy!**
