

Adding Content in Blackboard Ultra

Please note: our instructions may differ slightly from the specific Blackboard version and instance settings in use at your institution. Use these as a guide as they may not be an exact match to how Blackboard functions for you.

Adding Content to an Ultra Course

1. In the course, when **adding Course Content**, click on the **Content Market**.
2. In the **Content Market**, you should find the Infobase Learning Cloud tool by the name you chose. Click the **Plus (+) button** in the lower right corner to start the adding content process.
3. A placeholder for adding content should automatically appear.
4. Click the placeholder to initiate the Infobase Learning Cloud content search box.
 - **Locate and select** the content you wish to pull into your course and **Submit** in the upper right.
 - A submission successful message should appear, then go back to your course content.
5. If grading is wanted, click on the three dots to the far right and select Edit. Complete the grading as you want for your course.
6. Click **Submit**.

Please try pulling content into a test course and **enjoy!**
